

**Clarification to Questions Submitted**

City of Santa Clara  
Water and Sewer Utilities Department  
**Response Number: ONE**

**PROJECT NAME: Sanitary Sewer Siphon Lining**

**Date: 10-31-2016**

---

**TO ALL THE PROPOSERS:**

Following is a list of questions the City received for the above mentioned PROJECT. In this document, City is providing responses to all submitted questions. Clarifications to submitted questions are as follows:

**Question 1:**

Per Add Alternative Item 12, the documents do not specify exactly where bypass pumping is and is not allowed. Please provide a clarification indicating the manholes locations that cannot be used as suction or/and discharge.

**Response:**

There is no restriction on the manholes that can be used. However, if bypass pumping is used, it is contractor's responsibility to identify and show the manholes on the bypassing plan. The bypassing plan needs to be submitted to the City for review and approval prior to the start of the work.

**Question 2:**

What is the diameter of the upper portion of the inlet and outlet boxes above the square vault portion? The information is shown in CCTV, but not in the as-builts.

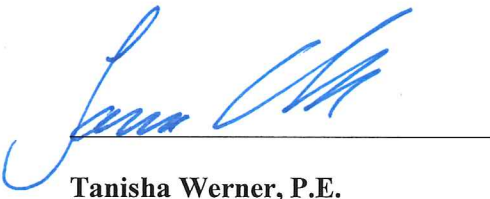

**Response:**

The City does not have the requested information. Please use the information from the CCTV provided. It is the contractor's responsibility to measure and gather all the needed information before preceding the work.

**Proposers shall acknowledge receipt of this clarification document by e-mail to [twerner@santaclaraCA.gov](mailto:twerner@santaclaraCA.gov) and [smehta@SantaClaraCA.gov](mailto:smehta@SantaClaraCA.gov) .**
